RW

EXPERTISE

Ruby, Ruby on Rails, JavaScript, React.js, Redux, SQL, Git, HTML5, CSS3, React Native

EDUCATION

UNIVERSITY OF CALIFORNIA, IRVINE   (Fall 2012 - Summer 2016)
BS - Computer Science

APP ACADEMY   (Spring 2017)
Immersive software development course with focus on full stack web development

PROJECTS

UNCAPP'T (*Ruby on Rails, JavaScript, React, Redux)*   Live Site | Github
Full stack web app inspired by Untappd
- Utilized Cloudinary API to to store user-uploaded images in the cloud, minimizing application size
- Protected CRUD operations through hand rolled implementation of frontend and backend user authentication using BCrypt.
- Minimized SQL queries made to server by pre-fetching and caching data on the front-end

Chowtime (*React Native)*   Live Site |
Github
Mobile app for deciding on where to eat
- Implement Yelp Fusion API to fetch restaurants that match user entered search criteria
- Utilize user's device geolocation with Google Maps API to provide directions to the restaurant from the App.

EXPERIENCE

SOFTWARE ENGINEER APPRENTICE | 2017
App Academy
- Overhauled internal applicant tracking webpage, switching from rendering HTML partials, to React components for a more responsive, user friendly experience.
- Conducted technical screens of coding bootcamp applicants, and assessed algorithmic aptitude in various languages, including JavaScript, Ruby, Python, and Java

GENIUS, ACMT, ACiT | 2015-2017
Apple Inc.
- Troubleshoot and resolve hardware and software issues on the entire fleet of Apple products
- Completed over 20 technical and educational Genius Bar appointments each day
